AFTER TWENTY-SEVEN YEARS of designing and installing kitchens and baths for hundreds of homeowners in the Triangle area, including projects covering a wide range of styles, the designers at Kitchen & Bath Galleries are pros at turning wishes into realities.

When these local homeowners renovated their home, they turned to Kitchen & Bath Galleries to design a sleek, ultramodern kitchen, powder room, guest bath, and owner's bathroom with a European feel.

Michelle Verrill, designer at Kitchen & Bath Galleries, brought in Dura Supreme cabinetry for a modern edge. "I chose acrylic cabinets with a slab front. They have a high sheen and are very clean-lined, in keeping with the modern theme." Made in the USA with a long history of quality craftsmanship, the Dura Supreme product line has semi-custom to fully custom capabilities. "The homeowner wanted the cleanest look possible with all cabinet seams lining up, so we chose cabinet doors with roll-out interior drawers to provide the functionality needed in a kitchen," Verrill says. Only the island has drawers tucked out of sight.

The cabinetry blends well with the black backsplash the homeowner sourced from Russia to complete the streamlined design. A Wolf induction oven and an integrated Blanco granite composite sink keep the space sleek.

The bathrooms feature six-inch-thick Silestone countertops manufactured in Spain by Cosentino that sit atop floating vanities highlighted by under-vanity decorative lighting. Integrated Silestone sinks create a harmonious flow with the countertops.

With traditional, transitional, and modern vignettes featuring cabinetry, plumbing, hardware, countertops, and

appliances, homeowners have plenty of inspiration to see and discover in the kitchen and bath showroom to help in the transformation of their rooms.

"It's important for homeowners to get professional design help when building or renovating kitchens and baths," says Verrill. "An expert will know about the latest product innovations for supreme functionality, and help you define your style to create a home that is pleasing and comfortable for how your family lives. An experienced designer can help you decide what is splurge-worthy and what is not, so you'll be happy with the result for many years into the future." 📱
